PROFESSIONAL SUMMARY

Results-driven AI & Full Stack Developer candidate skilled in Python, React, NLP, and AWS, with hands-on experience building intelligent web applications and deploying cloud-native solutions. Engineered real-world projects including an NLP-based toxic comment filter and a semantic PDF QA system, and participated in national and international hackathons. Seeking a role as an AI Developer or Full Stack Developer to architect scalable, data-driven digital products.

EDUCATION

B.Tech – Artificial Intelligence and Data Science | CGPA: 7.49

Shree Venkateshwara Hi-Tech Engineering College, Tiruppur | 2023 – 2027

HSC | 68%

Vikas Vidyalaya Matric Hr Sec School, Tiruppur

SSLC

EXPERIENCE

Python Programming Intern | Tamizhan Skills | Mar 2026 (RISE Internship Program)

- Completed the RISE Internship Program in Python Programming, demonstrating dedication through hands-on projects and learning sessions.
- Developed Python-based solutions and contributed to real-world mini-projects, strengthening core programming and problem-solving skills.

AI & Web Development Intern | IBM SkillsBuild

- Developed responsive web applications using HTML, CSS, and JavaScript, implementing modern UI/UX best practices.
- Applied core AI concepts in guided mini-projects, bridging theoretical knowledge with practical implementation.

Full Stack Development Trainee | NoviTech R&D; Pvt. Ltd. | Dec 2025 – Jan 2026

- Completed a 30-Day MasterClass in Full Stack Development, gaining hands-on experience with modern web technologies and frameworks.

TECHNICAL SKILLS

Languages:	Python, Java, JavaScript
Frameworks & Tools:	React, Flask, Git, GitHub, VS Code
AI / ML:	NLP, Prompt Engineering, AI Chatbots
Cloud & Deploy:	AWS, Vercel, Netlify, Render
Databases:	MongoDB, Firebase, PostgreSQL

PROJECTS

AI Comment Filter – NLP-based Real-Time Toxic Comment Detection

- Architected an NLP pipeline using Python and transformer-based models to detect toxic comments in real time with 92%+ accuracy.
- Integrated the engine into a React front-end via Flask REST API, enabling live moderation across community platforms.
- Optimised model inference latency by 35% through batch processing and caching.

Document AI – PDF QA System – Semantic Search & Answer Extraction Engine

- Developed a PDF QA system using Python, LangChain, and FAISS-based semantic search to retrieve precise answers from multi-page documents.
- Deployed on Render with a React interface, cutting manual document review time by over 60%.

Weather App – Real-Time Weather Dashboard with API Integration

- Built a responsive React dashboard using OpenWeatherMap API, delivering real-time forecasts with dynamic UI themes.
- Deployed on Netlify with CI/CD integration, achieving 99.9% uptime.

CGPA Calculator – Flask Web Application with PDF Report Generation

- Engineered a Flask web app that computes CGPA and exports formatted PDF transcripts using ReportLab.
- Actively used by 100+ students for accurate academic record tracking.

CERTIFICATIONS

- Tamizhan Skills – RISE Internship, Python Programming (2026)
- NoviTech R&D; – Full Stack Development MasterClass (2025–2026)
- AWS – Cloud Practitioner Essentials (2025)
- IBM SkillsBuild – Web App Fundamentals (2025)
- TCS iON – Career Edge (2025)

ACHIEVEMENTS & HACKATHONS

- Participated in Ideathon 2026 – AI for Education domain, Tamizhan Skills (Jan 2026)
- Participated in TRIGENIX-26 – National Level 24-Hour Hackathon, Dhanalakshmi Srinivasan College of Engineering (Mar 2026)
- Participated in Hackathon 360° – 3.0 International Level Hackathon, KPR Institute of Engineering & Technology (Feb 2026)
